ONLY \$95

"The Whisper Quiet Whole House Fan System"

HOW IT WORKS....

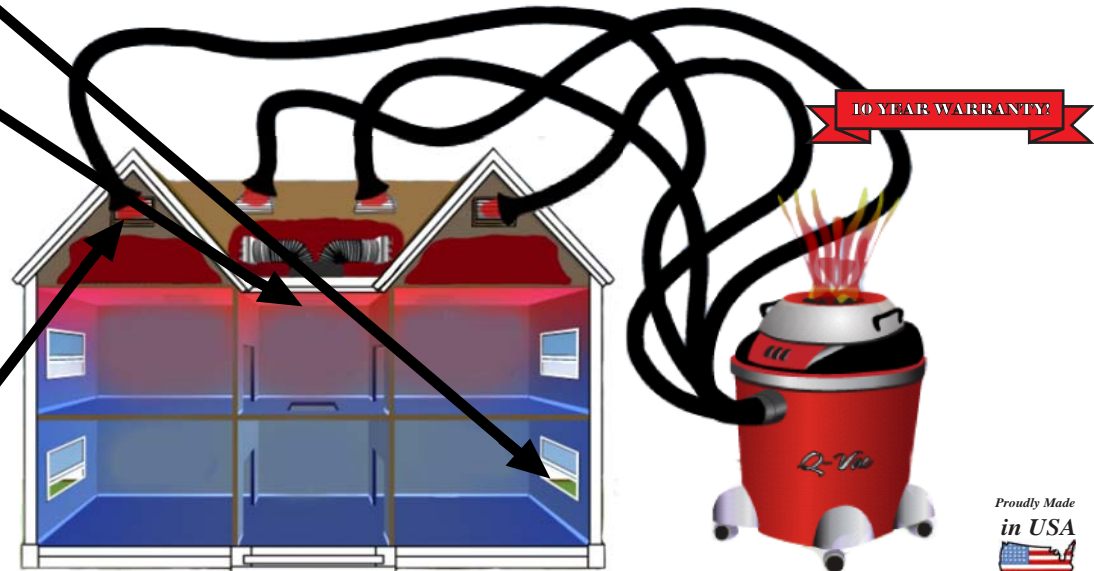

If you can imagine your home baking from the sun all day heating up your home and attic like a giant oven then turning on your QuietCool fans. Picture a giant vacuum sucking out all the hot air trapped in your home and attic while replacing it with fresh natural cool healthy air...**for pennies a hour!**

- 1** Open windows bring in fresh air.

 Open Window
- 2** Interior vent draws cool air in through house and into attic.

 Inside Vent
- 3** Hot attic air is forced outside.

 Attic Unit

US PATENT #7497774
